

HOWTO: Map the GIS fileserver to a local drive letter

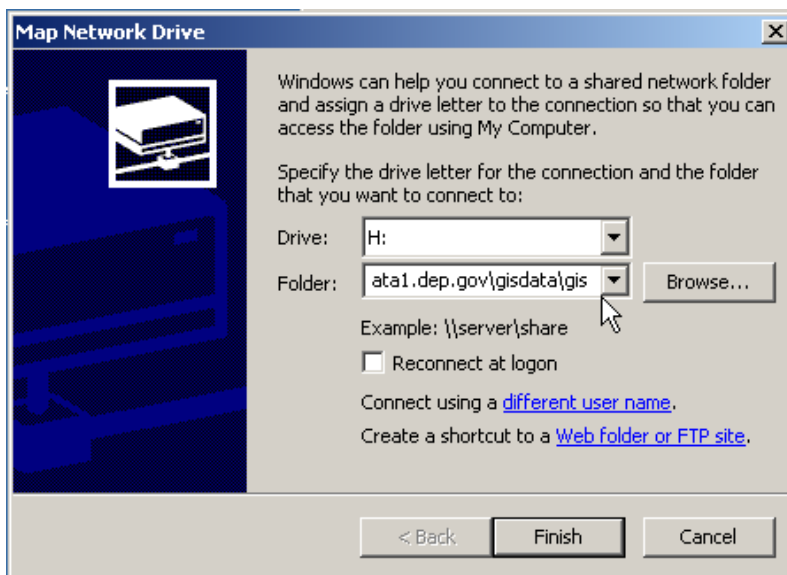

Users who need access to GIS data on their local computer, other than by using a citrix session, can map the GIS fileserver to a local drive using their citrix username and password.

1. right-click on My Computer and select "Map Network Drive"

2. Select a driver letter (typically M:) enter the following in the Folder Box:

\\gisdata1.dep.gov\gisdata\gis

3. Click on "different user name" and enter **dep\username** and your assigned password.
